
Magnus Schou

AstraZeneca

Magnus Schou is since 2014 an associate principal scientist at the AstraZeneca PET Science Centre at Karolinska Institutet. His focus is on the development of novel translational imaging biomarkers and radiochemistry approaches that permit late-stage labeling of drug molecules with ^{11}C and ^{18}F . Magnus earned his PhD from Karolinska Institutet in 2006 and has contributed to numerous drug discovery and development projects at AstraZeneca whilst publishing more than 45 research articles in the field of molecular imaging.
